

THE HEALTH INSURANCE MANAGEMENT PLATFORM

MEDASSUR +

One platform to manage, treat and insure — built for Gabon and the CIMA zone.

Health insurance management is still fragmented

Silos and spreadsheets

Every department runs its own tool. Nothing talks to the next, everything gets re-typed.

Manual CIMA compliance

Rates, benefits and regulatory documents kept up to date by hand.

Slow reimbursements

Weeks of back-and-forth between the insured, the provider and the claims handler.

No real-time view

The loss ratio is discovered after the fact, never live.

One platform, a place for every stakeholder

A single data engine. Tailored access for everyone — on web and on mobile.

The management console

A dashboard that runs the whole operation, at a glance

- Active policies, insured population, client portfolio
- Collections and cash position tracked day to day
- Real data, never an estimate

The full policy lifecycle, start to finish

- Underwriting → population → benefits → endorsements → renewals, in one screen
- New: an Assistance policy can now pool the population of several Health policies for the same policyholder
- Premium recalculated automatically across the combined population

Invoices and claims under control, in real time

Multi-line entry

Instant search for the provider and the insured, line by line.

Caps checked live

Benefit rates and caps checked at entry, never after the fact.

Documents generated automatically

Statement and settlement true to the client's own paper model.

Your documents, your brand — pixel for pixel

- Receipts, statements, settlements, endorsements: the client's own paper template, reproduced exactly
- The broker's or insurer's logo replaces plain text, large and sharp, on every document
- Electronic signature and QR verification on the documents that require it

Receipt — broker's identity

Endorsement — insurer's identity

Statistics that drive the decision, not delay it

690 M+ FCFA

in claims tracked and analyzed
continuously

Loss ratio

computed per policy and per period, live

PDF / Word

reports generated on demand, with real
charts included

Artificial intelligence

An AI copilot for your teams, built into the app

- Drafts letters, explains a benefit, helps reconcile an account
- Answers CIMA compliance questions, right from the screen
- Never invents a figure: points to the right screen for any real data

An agent that answers insured members and providers, 24/7

Reviews a file

Prescription, estimate, caps — a decision is suggested from the real benefits.

Reads live data

Benefits, consumption and family history, in real time.

Knows its limits

Hands off to a human claims handler with a full summary whenever needed.

Security, compliance and trust

Multi-tenant, fully isolated

Every insurer, broker or mutual sees only its own data — isolation enforced at the database level itself.

Electronic signature and QR

Every signed document carries a QR code; a public verification page confirms its authenticity.

CIMA Code compliant

Rates, benefits and regulatory documents kept up to date inside the application.

A channel for every stakeholder

Member Portal — their card, their benefits, one click away

- Insurance card, benefits and status at a glance
- Prior-authorization and reimbursement requests online
- Household spend detailed by beneficiary and by benefit type

Policyholder Portal — the whole client company, self-service

- Policies, beneficiaries and requests in one place
- Staff additions and departures in a few clicks
- Company consumption statistics, by benefit type

Provider Portal — billing and claims submission made simple

- Patients, services and estimates in one workspace
- Processing referrals and submitting invoices electronically
- Real-time financial tracking and settlement statements

Physician Portal — prescriptions, fully digital

- Up-to-date queue and patient records
- Consultation and prescription entered directly online
- Full history of the patient's care

One unified inbox for every conversation

- Insured members, policyholders, providers and claims handlers in a single thread
- Several attachments in one send, merged automatically into one document
- Automatic follow-up when a file is waiting on a missing document

In their pocket

The mobile app — insurance in their pocket

- Insurance card, benefits and provider network, offline included
- Prior-authorization and reimbursement requests, photo attached
- Digital health record for the whole family

The screenshot shows the 'Nouvelle demande' (New request) screen in the MEDASSUR+ app. At the top, there is a back arrow and the title 'Nouvelle demande'. Below this is a search bar containing 'CABINET MARTEL' and a magnifying glass icon. The next section is 'DATE DE LA DEMANDE' (Date of request), with a 'Date *' label and a text input field showing '08/10/2026'. Following this is 'ACTES DU DEVIS (FACULTATIF)' (Optional quotes/acts), with a button labeled '+ Ajouter un acte' (Add an act). The 'DOCUMENTS' (Documents) section contains two items: 'Ordonnance' (Prescription) with a file name 'IMG_20261008_084520_437.j...' and a 'Changer' (Change) button, and 'Devis' (Quote) with a file name 'IMG_20261008_084212_532.j...' and another 'Changer' button. A note at the bottom of the documents section states: 'Ordonnance ou devis obligatoire pour envoyer la demande.' (Prescription or quote mandatory to send the request). The footer of the app shows 'MEDASSUR+ — the health insurance management platform'.

MEDASSUR+ — the health insurance management platform

MEDASSUR+ in production, today

7,755

insured members managed
in production

50

active policies run in real
time

6

business portals, a single
data engine

690 M+

FCFA in claims tracked

What sets MEDASSUR+ apart

All-in-one

Back office, portals and mobile on a single data engine.

AI built in

Into every step of the process, not a bolt-on gadget.

Document fidelity

Every document reproduces the client's exact brand.

Built for Gabon

And the CIMA zone — not a generic platform adapted afterwards.

What's coming next

- More channels for the conversational agent (WhatsApp, email)
- Electronic signature and QR extended to every document
- New management reports by agency and by insurer

Let's talk about your portfolio
